Subject: Annual inspection

Good morning,

I packed the 80-000815 instrument to be sent. You should be receiving it soon.

The last week end of June the instrument stopped working and showed "modem failure" we didn't use it for a while then we were able to do the inspection a couple weeks ago. It must have reset from turning it off and leaving it off?

Thank you,

He who commits injustice is ever made more wretched than he who suffers it. Plato

Hello,
 I got both instruments "comms transfer" to go through. We should be up to date on all inspections at this point.
 Thank you ,

He who commits injustice is ever made more wretched than he who suffers it. Plato

Subject: April's Monthly Inspection

I conducted both of the inspections for the 815 and the 816. I printed out both of the form 40's, no problem. When it dialed the number to upload the inspection, it come back as busy and would redial itself after every 5 minutes. It did this 3 separate times for each machine. Any help would be helpful.
 Also can I get a fax number so I can fax the monthly inspections to FDLE. Thank you

Sgt. Forinash
