Subject: 80-000833 Out of Service

Follow Up Flag: Follow up
Flag Status: Flagged

80-000833 was taken out of service on 10/05/2016 after a compliant agency inspection due to a dead internal backup battery. The instrument will be taken to an authorized repair facility for replacement of the battery.

This is to follow-up my telephonic notification to you this date regarding instrument 80-000833. I removed it from evidential service because of DSP Fail during breath test attempts this past weekend and then DSP Fail during the diagnostic tests coming out of STANDBY.

An agency inspection cannot be conducted because of the DSP Fail at start-up diagnostics. I was able to upload the existing data in the instrument to FDLE/ATP.

The instrument will be transported to a repair facility in the near future.
