Brett,

Please deregister Kennedy Space Center instrument #80-001440.

Thanks,

Shayla

We were under the impression that the wrong regulator was purchased on your end...or on CMI's end in Kentucky, so I don't know how the refund request would work.

You can just go ahead and de-register the instrument now, and then send it to us. We have a back-up instrument to use until we get the replacement.

I can send this instrument back to you however, it cannot be used since it has not had the appropriate replacement of the dry gas regulator. I'll also ship back the incorrect regulator so that your agency can request a refund from CMI.

Thanks,

Shayla

Shayla,

We don't want the old Intoxilyzer deregistered until we have the new one there and ready to be registered. Once the funding is approved for the new instrument, and it arrives in Tallahassee to be registered, then we can take care of that.
