Subject: Intox 80-6764

We did our first agency inspection last night on instrument 80-6764 which is one of our 2 brand new Intoxilyzers mounted in the patrol cars. The agency inspection went fine but when we tried to upload to y'all we got a message of "rebuilding headers". I called Danielle to see what to do but it went into ready mode right after I called her so I hung up. Right after it went to ready mode it read "Contact CMI" and then gave a code of "010". Danielle said to send it to CMI but send it to you first to retrieve the agency inspection we successfully completed. I am FedExing it to you today for you to send to CMI. I am requesting an evidential loaner in the interim since this is a brand new instrument that we have already planned on starting to use today and now am going to have no one in the St. Augustine area with an in car Intox. Thanks in advance and call me if you have any questions.
