Comments: Instrument 5249 has been flagging "Interferent Detect" messages at inappropriate times. I have tried several times to duplicate at FDLE with no success. To rule out a possible simulator issue, I brought FDLE simulators to use in the inspection. Observed the pre-inspection setup and Agency Inspection.

Comments: Tested the agency's simulators outside the inspection. The sims had no visible cracks, passed my seal leak checks, and were recently calibrated within the calendar year. Turned on fan to encourage air flow during the Agency Inspection. The AI closed the cap to the acetone bottle right away.		

Action:		Comments:
<input type="checkbox"/> Instrument Complies with Chapter 11D-8, FAC <input type="checkbox"/> Instrument Does Not Comply with Chapter 11D-8, FAC	Instrument 5249 passed its inspection in my presence with no irregularities or repeated tests. Discussed switching the acetone and water sims in case there is an undetectable leak causing an accumulation effect in the air. Will send to repair if it occurs again.
