Hi Taylor,

I am sorry I did not get this done. It has been kind of crazy. I have attached Dec 2022's inspection reports. The amended one shows the correct solution lot numbers. I know it looked confusing because they are mostly all in date, but I used the wrong sheet while doing the first inspection so I used the wrong lot numbers.

I also attached Jan 2023's because I am not sure if I sent you that already. Please let me know if you have any questions. Thank you .

Adam DeSantis

Subject: 6692 December Inspections

Good morning,

Back in December, it looks like there were two Agency Inspections conducted on instrument 6692. The comment on the second inspection indicates that the first inspection used incorrect solution numbers... but reviewing the lot numbers entered, they appear to be good/non-expired solutions. Can you clarify?

Also it looks like the DGS lot number/expiration date were incorrectly entered in place of the 0.20 lot information on the second inspection (page two of the attachment). Can you correct this and send the amended Form 40 back to me?

Thanks!
