

MEMORANDUM

DATE: July 9, 2018
TO: Viewers of Subject Test Electronic Data
FROM: Brett Kirkland, Program Manager, Alcohol Testing Program *BK*
SUBJECT: Changes to Electronic Subject Test Data April 2014 – May 2018

In May of 2018, it was brought to our attention that the Arresting Officer's Agency Name and the Breath Test Operator's Agency Name were appearing in reverse order on Electronic Data reports. Upon review, it was determined that the field entitled 'Opr_Agency' was labeled incorrectly on the Electronic Data Reports as Arresting Officer Agency. The field entitled 'Arr_Agency' was mislabeled on the Electronic Data Reports as Breath Test Operator Agency. These two fields were reversed and the reports have been corrected. The template switched fields within the same breath test and no information was crossed with any other breath test.

Please note, the fields and their associated data were and continue to be correctly labeled in our database and the information for each breath test is contained as a separate and single record. The raw data remains correct and all information was and continues to be properly labeled. The issue only related to the generation of Subject Test Electronic Data. Original Breath Test Affidavits (Form 38) are in no way affected by this issue. Original Breath Test Affidavits are printed at the time of the test and prior to being uploaded to the FDLE's database.
