

## **Single Criminal Justice Identification Number**

The workgroup discussed the need to be able to associate all of the juvenile's records with all of the adult records. We would like to undertake a project that will lay to ground work for the CJJIS Counsel to determine if it is possible to have a single criminal justice identifier that will accomplish this goal.

The proposed first step is to inventory all Counsel Members to determine how each system generates the identifier that is used by the member's applications. From this inventory, the workgroup would develop a profile of the criminal justice identifiers.

The profile will assist the workgroup in identifying issues or problems associated with the use of a single identifier.

## **Developing a Cross Reference of Data between Criminal Justice Agencies**

To facilitate sharing data, the workgroup discussed the need to better understand what data is being collected by Counsel Members. The workgroup would like to undertake a project to begin identifying the data collected by each Member and cross reference the data between Members.

The workgroup would propose that the first phase of this project be limited to demographic data. Once this phase is completed and presented to the Counsel, future phases would be reviewed and a work plan proposed.
