FDLE Launches New Initiatives to Reduce Backlog - In February 2007, FDLE partnered with Marion, Hillsborough, Seminole, and Santa Rosa county sheriff's offices to introduce an innovative new program to train sheriff's personnel to pre-screen evidence collected at crime scenes for the presence of DNA. The federally-funded pilot program is the first of its kind in the country and trains sheriff's personnel to pre-screen evidence collected at crime scenes, ensuring that items most likely to produce a DNA profile are submitted to FDLE's crime labs. The pilot is designed to expedite the overall DNA analysis process by minimizing the number of submissions without evidentiary value. Additional law enforcement agencies plan to take the training in upcoming months.

In March 2007, FDLE announced plans to expand its Fort Myers Crime Laboratory to include DNA analysis in an effort to reduce DNA backlog due to a surge in evidence submissions. The plan calls for DNA screening to occur first, followed by full DNA analysis beginning in October 2007. Once fully operational, the Ft. Myers Crime Lab will have the capacity to process at least 55 DNA service requests per month. FDLE currently provides DNA analysis at its crime labs in Tallahassee, Jacksonville, Pensacola, Tampa, and Orlando.

The implementation of these efforts is part of a multi-faceted plan implemented by FDLE in response to a surge in evidence submissions which resulted in backlogs statewide, particularly in DNA.

Sexual Offender/Predator Sweep Nets Arrests - In February 2007, FDLE announced results of a statewide effort to locate, and where appropriate, arrest individuals who have absconded from Florida's sexual offender/predator registry. The Sexual Offender Apprehension Program (SOAP) resulted in the location of 458 absconders. Of these absconders, 172 were arrested and 286 were verified as deceased, incarcerated, determined to be no longer living in Florida, or located and registered in accordance with the law. The operation also ensured warrants were in place for an additional 614 absconders. The mission of the operation focused on locating absconded sexual offenders and predators, arresting those who were non-compliant, and verifying the whereabouts of many others. The SOAP was a coordinated effort between FDLE, sheriff's offices, police departments, Department of Corrections, and the U.S. Marshal's Office that began on Sept. 14, 2006 and concluded Jan. 26, 2007.

Arrest Made in 1991 Killings - On December 19, 1991, Paul and Rita Stasny were shot and killed during an alleged home invasion robbery in Port Charlotte, Florida. That same morning, four individuals were murdered in another alleged home invasion robbery less than five miles away. Forensic evidence and investigative leads linked the murders and investigators believed they were committed by the same individual(s).

A multi-agency task force consisting of more than 40 investigators from FDLE, Charlotte County Sheriff's Office, North Port Police Department, and the State Attorney's Office, 12th and 20th Judicial Circuits, was developed to investigate the homicides. For more than 14 years investigators searched for the information that would lead to an arrest.

In March 2007, FDLE, along with other task force agencies, announced the arrest of Jeremy Sly, an inmate at Charlotte Correctional Institution, for the 1991 murders of Paul and Rita Stasny. Investigators say Sly revealed specific information regarding the crime that only the killer(s) would know. Sly is already serving a life sentence on an unrelated homicide conviction.

¹ **Average number of days to complete lab service requests** – This measure calculates the average amount of time required to complete a service request once the crime laboratory receives it. Laboratory turnaround standards and productivity were significantly impacted by the increase in the number of service requests received and the number of members currently in trainee status. The department has developed a 10-point plan to reduce the number of backlogged service requests. As part of the plan, FDLE has purchased robotics for DNA sections across the state, developed new case acceptance guidelines, implemented more effective workload and staffing management practices, maximized overtime use, and outsourced DNA backlogs to other private, accredited labs. Twenty new scientists FDLE received from the Legislature in 2005 recently completed training and 10 of the scientists are assigned to DNA.

² **Investigative Services** – During the first two quarters of the fiscal year, three investigative measures were incorrectly reported. Correct data is reported for the third quarter.

³ **Public Assistance Fraud (PAF) Services** – Changes in federal food stamp program policies have resulted in a decrease of the number of administrative hearing referrals received. Additionally, the PAF program is engaged in more complex criminal investigations which require more time and effort to investigate, resulting in fewer case closures.
