

Discipline and Deviant Behavior in Our Youth

Ron Bell

Are American youth under disciplined, over coddled? The question has been asked and studied by experts frequently in the last few years. The number of young people involved in deviant or criminal behavior has not only tripled, but the age of those involved has become younger. People have been worried by such matters as the rise in juvenile delinquency, and often criticize that our schools are too soft. Trouble in the American family has led to trouble with today's youth. Never before have the advantages been so great, yet the great majority of our youth today are filled with hopelessness and despair.
