Please de-register Intoxilyzer 80-001724 until we decide to have it repaired.
Sorry for the delayed response.

Sir,
You have an Intoxilyzer 8000 breath alcohol instrument which hasn't been used for a number of years and is now in an inoperable condition. We at FDLE would like permission to deregister the instrument. As it is, now, Rule 11D-8 F.A.C. requires a yearly inspection of this instrument, which in this particular case entails a considerable outlay of time and effort, all to no good purpose. Should you ever wish to put this instrument back into service, it can be re-registered without problem. Please let us know your decision. Thank you.
