**Subject:** February 2018 Eustis Police Department Agency Inspection

Good afternoon,

Our department sent our Intoxilyzer to FDLE the end of December 2017, in anticipation of it being received the first week of January 2018, and the annual inspection completed.

Due to the instrument needing to be sent to CMI we have not received the instrument back as of yet. CMI advised they were still working on the instrument. The February 2018 inspection could not be performed at this department. I sent an email out advising the same information for the January Inspection in January.

This email is to notify the respective agencies the reason for no inspection performed January and February.

Have a great day!  
Robert
