From: Captain Joshua Pitts
Subject: Intoxilyzer 8000 's

After completion of the annual inspections please return both Intoxilyzer's. After I receive them, then we will have them donated when the deregistration is completed.

As a reminder, 80-001341 has a power issue and we attempted to have it fixed by enforcement electronics. It might be a fuse.

Thank you,

Captain Joshua Pitts

Desoto CSO requests the deregistration of these instruments. I suggested that the AI still ship them to us for the yearly inspection since they were used as evidentials earlier this year and will be donated to another agency or a training facility. 1341 has a power issue, possibly needing fuse replacement or repair, so it may not be able to be inspected. Just FYI so we can all update our lists. These two instruments are pending on the SDP Region.

Sir,

We recently purchased two new 8000's from CMI and are looking at deregister the following two instruments.

80-001340

80-001341

We will be sending both instruments to you as soon as possible for their final annual inspection.

NOTE: 1341 has a power issue and we attempted to have enforcement electronics fixed this issue to no avail. The main issue is the instrument does not turn on when the main power button is turned on. Might be a fuse.

Thank you,
