CAUTION: This email originated outside of FDLE. Please use caution when opening attachments, clicking links, or responding to this email.

Good afternoon, Taylor!

Instrument 7169 was taken out of service last month. Although it had passed inspection, the display froze during the analytical testing at the conclusion of the test. The instrument was sent to CMI for repair. CMI will attempt to print out ATP Form 40 prior to repair.

Instrument 902 has been taken out of service since the last inspection on 9/14/22 until further notice, due to it not being used by the BTO.

Please advise if there is anything further you need from me.

Thank you!

Time for you to shine in court tomorrow!
