

Florida Highway Patrol (FHP)

If FHP works a case that involves an unidentified deceased person, the medical examiner's office should provide the FHP Traffic Homicide Investigator with the completed portion of the NCIC worksheet that pertains to the medical examiner's examination. The investigator will have the FHP Regional Communications Center enter the information into the FCIC/NCIC database.

The point of contact for any questions about this procedure is:

Florida Highway Patrol
Traffic Homicide Department
