**secure FLORIDA.org**

Users will find information on everything from spam email to network intrusions to reporting computer crimes.

SecureFlorida.org is a one-stop shop for cyber news and information for all computer users.

The Beacon - *The Secure Florida Beacon is a newsletter designed to help members stay informed on the most important news stories that affect their online security.*

**C SAFE**
Cyber Security Awareness For Everyone

Secure Florida offers free **CSAFE** classes that focus on topics critical to the safety of all computer users.

## 10 Best Practices
Explains the reasons behind our 10 Best Practices, and how to implement them.

## Identity Theft
Explains both the high-tech and low-tech ways your identity can be stolen, and gives valuable tips on prevention and recovery.

## Custom Classes
If you don't see what you are looking for, let us know... we'll work with you to create the perfect class for your particular group.

## Building/Becoming the Human Firewall
Provides cybersecurity awareness training for employees and their managers and includes information on email safety, passwords, network security, common scams, and social engineering.

## Online Safety for Seniors
Simple steps that seniors, as well as their families and caregivers, can use to keep themselves and their families safe while still enjoying the benefits of the Internet.

Do you know what web sites your children visit?

Do you know who their online friends are?

## Family Online Safety

### Parents online safety
A 1-hour seminar that discusses best practices kids and parents can use to stay safe online.

### Kids online safety
A 45-minute class that teaches kids web-surfing habits and discusses how to stay safe online.

### Combat Cyberbullying
Designed for parents, teachers, and school counselors, this covers the unique features of online bullying and the steps we can take to prevent and report it

**CSAFE is free to all Floridians.**

*CSAFE's flexibility ensures that CSAFE classes are truly for everyone...*

# Best Practices for Internet Security

- Have a strong password and keep it safe.

- Use antivirus software and keep it updated.

- Make sure your firewall is turned on.

- Apply your software security patches and updates.

- Review your privacy settings on social networking sites.

- Research any file before you download it.

- Beware of websites and emails that ask for personal information.

- Watch out for frauds and scams.

- Secure your home wireless network.

- Mobile devices are also computers; secure them.
