Additional Justification:

Martin County Sheriff's Office (MCSO) is requesting funding for body armor and protective equipment such as bullet proof vests, helmets, eye/face protection, gloves, elbow and knee pads, tactical goggles, and hearing protection for Warrant Service Officers. This equipment will allow for safety during high-risk encounters, transport operations, and tactical responses while handling inmates that fall under the immigration grant. These items will help reduce the risk of serious injury, from assault, gunfire, hazardous conditions, and immigration enforcement activities. Additional equipment being requested are handcuffs, leg irons, and an ARC rail adaptor, which will provide secure methods of detainment and transport for the immigration inmates being housed within our facility. These tools limit escape opportunities and reduce officer and detainee injuries to ensure compliance with custody standards. The OC spray and tasers are control tools that are effective forces for controlling combative or noncompliant individuals while minimizing the risk of lethal outcomes.

MCSO is also requesting funding for five (5) mobile License Plate Readers (LPRs) for Designated Immigration Officers to improve real time communication and coordination between officers and ensure safer and faster responses times when responding to the enforcement of unauthorized aliens. The LPRs would enhance the ability of officers to identify, track and intercept vehicles associated with individuals who may be subject to immigration enforcement or investigation. The technology provides real time data on vehicle registrations, alerts for stolen or flagged vehicles, and rapid identification of subjects of interest, which supports the program's goals of strengthening local partnerships in immigration related enforcement. By automating data collection and reducing reliance on manual checks, LPRs improve operational efficiency, officer safety, and accuracy in identifying potential threats, ultimately contributing to safer and more effective enforcement actions.

Additionally, a Rapid DNA machine is also being requested to be utilized within our Forensic Science and Digital Forensics Unit at MCSO. This machine is imperative for our agency under this program because it provides the ability to confirm biological relationships and identities quickly and accurately in unauthorized alien-related cases. Traditional DNA testing can take weeks/months, delaying investigations and enforcement actions. The Rapid DNA machine delivers

results within a matter of a couple hours. While focusing on immigration cases, without the Rapid DNA machine, it causes the possibility for the unauthorized alien suspects to disappear into the community or other areas with a chance of not being located. These machines not only deliver accurate results quickly, but the machine will enable officers to make timely, informed decisions that directly support enforcement objectives, enhance public safety, and most importantly, ensure compliance with federal and state immigration protocols.

	The Town of Welaka Police Department is requesting for five (5) Automated License Plate Recognition Systems with software to enhance immigration enforcement operations.	
Automated License Plate Recognition System	Direct Cost: \$50,000.00 Approx. (5) ALPR systems, 3-year bundle at an approx. cost of \$16,667 per year = \$50,000.00. The systems will include: 1) One-time installation standard implementation to include site assessment, camera setup and testing and shipping. 2) Data integration and intelligence platform subscription.	\$50,000.00

Additional Justification:

The Town of Welaka Police Department (WPD) is requesting funding for Automated License Recognition (ALPR) systems to enhance the department's immigration enforcement, improve criminal interdiction capabilities, and strengthen regional law enforcement partnerships. Welaka is a small, rural municipality located in the southern portion of Putnam County, west of Highway 17. The WPD operates with only two sworn officers and is responsible for monitoring four primary entrances and exits into the town. The installation of ALPR systems will enable the WPD to more effectively identify vehicles associated with immigration violations, human smuggling, stolen vehicles, wanted people, and other criminal activity. ALPR technology automatically captures and analyzes license plate data, cross-referencing results in real time against national and state databases such as the National Crime Information Center (NCIC) and the Immigration Violator Files maintained by U.S. Immigration and Customs Enforcement (ICE).

Placing these systems at the southern entry points of Putnam County will extend coverage beyond Welaka's jurisdiction and provide substantial benefit to the Putnam County Sheriff's Office (PCSO) and regional partners. Vehicles traveling northbound on Highway 17 or west from adjacent counties often pass through Welaka before entering more densely populated areas of Putnam County.

In addition to PCSO, the Palatka Police Department, Florida Highway Patrol (FHP), and Florida Fish and Wildlife Conservation Commission (FWC) will be key partners in this initiative. These agencies routinely conduct traffic enforcement and criminal interdiction within and around Putnam County. Through cooperative data-sharing agreements, all participating agencies will have the ability to access and utilize the Welaka ALPR system, while WPD will, in turn, gain reciprocal access to ALPR data and camera feeds maintained by these partner agencies. This two-way sharing will enhance investigative capabilities, support regional operations, and allow for faster identification of suspects or vehicles tied to immigration violations, trafficking networks, or other ongoing investigations.
